# Integrated Planning and Reporting

Council is committed to sustainably planning for the future of Campbelltown and Council does this by working directly with the community to understand the vision for the city and its people.

This vision is delivered through a set of strategic plans including this document. These plans inform and guide the decisions made on behalf of the community as well as setting out the actions and deliverables that will help drive towards this shared vision.

Council ensures its strategic plans are developed in accordance with the statutory requirements of the NSW Integrated Planning and Reporting Framework (IPR) introduced in 2009. The framework recognises that Council and the community do not exist in isolation but are part of a larger framework that is interconnected. Council is required to write and report on these plans in a transparent and consultative manner. Campbelltown is championing IPR as a method to improve its internal planning and external communication and engagement.

The framework is designed to give the Council and the community a clear picture of:

- The long term vision for the City (Community Strategic Plan - Campbelltown 2027)
- What Council will deliver to get there (Delivery Program, Operational Plan and Resourcing Strategy)
- How progress towards the vision is measured (Quarterly, Annual and End-of-Term Reporting)

An integral part of this process is incorporating State and Federal planning into Council's processes and ensuring emerging issues and opportunities for the city are considered, mitigated and harnessed. This ensures Council is aware of when to align its planning, advocate for alternatives or take the initiative to shape the change for Campbelltown.

Data is also becoming an increasingly important factor in decision making for organisations and Council is embedding key data sets into its planning and decision making processes. Key demographic, community, environmental and organisational data is being used to inform the way Council delivers its services and makes key decisions.

Referred to as Corporate Planning, all of Council's key Integrated Planning & Reporting documents and reports can be found at:

[www.campbelltown.nsw.gov.au/CouncilandCouncillors/CorporatePlanningandStrategy](http://www.campbelltown.nsw.gov.au/CouncilandCouncillors/CorporatePlanningandStrategy)

## About This Plan

The Long Term Financial Plan forms a key component of Council's Resourcing Strategy. The Community Strategic Plan provides a vehicle for each community to express its long term vision and the Delivery Program and Operational Plan provides the actions and initiatives to deliver on this.

However, these aspirations will not be achieved without sufficient resources – time, money, assets and people – to carry them out. The Resourcing Strategy is a critical link when it comes to translating strategic objectives into actions. The Long Term Financial Plan ensures Council has the funding and investment strategies required to deliver on its projects and objectives.

*Integrated Planning & Reporting (Corporate Planning) at Campbelltown*

# Long Term Financial Plan

The Long Term Financial Plan (LTFP) is an integral part of Council's strategic planning cycle. This enables long term community aspirations and goals to be tested against financial realities.

The plan is a decision making and problem solving tool. The financial objectives, performance measures and strategies that Council has adopted in meeting financial sustainability challenges over the 2020-2030 period are presented in this document.

It is not intended that the plan be inflexible - it is a reasonable guide for future action based on current information. The modelling that occurs as part of the plan will provide an opportunity for Council to identify financial issues at an earlier stage, and gauge the effects of these issues in the short to long term.

The plan does not indicate what services or projects should be allocated funds; rather, it addresses areas that impact on Council's ability to fund services and capital programs.

As with most NSW councils, Campbelltown faces a challenge in funding ongoing operations and adequately maintaining its community assets. The growth in the cost of labour and materials, increasing demand for affordable services and cost shifting from other levels of government, combined with a legislated cap in revenue generated from rates and developer contributions, have created a difficult financial environment.

The confirmation by the NSW Government of the Campbelltown/Macarthur CBD as one of Sydney's Strategic Centres is a major economic boost for the City. To ensure Campbelltown maximises the opportunities that the projected growth will deliver in terms of prosperity for the City of Campbelltown, the enhancement of residents' access to new jobs, better facilities and improved services. Council will need to respond and adapt to the challenge of rolling out its own services, and operating its own facilities more cost effectively and with an improved focus on customer service and satisfaction.

Council will be looking towards strengthening its already strong partnerships with State and Federal government agencies to assist with the development of critical infrastructure and ensure that the City's next phase of growth and development will deliver the right outcomes for our City.

Due to the length of the planning horizon, the plan becomes more general in future years. For example, the 10th year of a 10 year plan does not include specific detail, however, does show likely trends based on accepted assumptions.

The 2021-2022 adopted budget and 2018-2019 Financial Statements form the base years for the Long Term Financial Plan.

This Plan has been prepared in accordance with the requirements as outlined in the Integrated Planning and Reporting Manual for local government in NSW, March 2013 issued by the now Office of Local Government NSW, Department of Planning, Industry and Environment.

## **COVID-19 Update**

The corona virus (COVID-19) pandemic has presented to Council a unique environment in which this LTFP has been prepared in.

The unprecedented nature of the current crisis means it is difficult for Council to fully understand the impact COVID-19 will have on Council's long term financial position. Where possible, Council has modelled reasonable assumptions into the forecast and will reassess this modelling in the subsequent LTFP. Council will also report on required amendments to the Operational Plan and Budget quarterly.

# Financial Sustainability

For councils to meet the service and infrastructure needs of their communities, they need to be financially sustainable. The NSW Treasury Corporation (TCorp) defined a financially sustainable council as one that, over the long term, is able to generate sufficient funds to provide the level and scope of services and infrastructure, agreed with its community through the Integrated Planning and Reporting process.

## What is Financial Sustainability?

In considering the issue of financial sustainability, TCorp and the Office of Local Government (OLG) have established what they consider to be a concise definition, that being:

*A local government will be financially sustainable over the long term when it is able to generate sufficient funds to provide the levels of service and infrastructure agreed with its community*

## Measuring Financial Sustainability

It is important that Council regularly assesses its financial performance and position against the projections contained in the LTFP. As part of this process Council needs to determine what factors it will monitor on a regular basis. It is proposed that these factors include the following:

### Sustainability

That Council can generate sufficient funds over the long term to provide the agreed level and scope of services and infrastructure for communities as identified through the Integrated Planning and Reporting process.

#### Operating Performance Ratio

- Measures Council's achievement in continuing operating expenditure within operating revenue
- Benchmark: > or equal to break-even (0%)

#### Own Source Operating Revenue Ratio

- Measures fiscal flexibility and the degree of reliance on external funding sources such as grants and contributions
- Benchmark: >60%

#### Building and Infrastructure Asset Renewal Ratio

- Assess the rate at which these assets are being renewed against the rate at which they are depreciating
- Benchmark: >100%

The Building and Infrastructure Asset Renewal Ratio measures Council's expenditure on the renewal of fixed assets as a proportion of depreciation. The future sustainable management of Campbelltown's infrastructure assets is critical for the development and overall wellbeing of the community

It should be noted this ratio uses depreciation as the denominator and ignores the calculated renewal funding requirement under lifecycle costing of an asset as modelled in Council's Asset Management Plans. However, this ratio is used by the Local Government Code of Accounting Practice and is also a Fit for the Future measure, hence why it has been published as part of this plan

## Effective Infrastructure and Service Management

That Council can maximise the return on resources and minimise unnecessary burden on the community and business, while working strategically to leverage economies of scale and meet the needs of communities as identified in the Integrated Planning and Reporting process.

### Infrastructure Backlog Ratio

- Indicates the proportion of backlog against the total value of Council's infrastructure assets
- Benchmark: <2%

### Asset Maintenance Ratio

- Reflects the actual asset maintenance expenditure relative to the required asset maintenance
- Benchmark:  $\geq 100\%$

### Debt Service Ratio

- Assesses the impact of loan principal and interest repayments on discretionary revenue
- Benchmark: Between 0% and 10%

## Liquidity

Liquidity is a key factor in the viability of any organisation, regardless of whether it is in the commercial or government sectors. The ability to meet short term funding requirements and obligations is equally relevant to a Council as it is to any business

### Unrestricted Current Ratio

- Reflects Council's ability to meet debt payments as they fall due
- Benchmark:  $>1.5\%$

### Cash and Expense Coverage Ratio

- Indicates the number of months Council can continue paying for its immediate expenses without additional cash inflow
- Benchmark:  $\geq 3$  months

Council monitors the short term funding requirements daily and produces cash flow estimates on both a short term and long term basis. This monitoring and forecasting informs Council's investment strategies and decisions to ensure that adequate liquidity is maintained. Council will also, as part of the reserves strategy, continue to provide for adequate levels of reserves to fund less predictable outlays, such as major employee leave entitlement payments.

The cash and expense coverage ratio tests the unlikely situation where Council will no longer receive any additional cash inflow and how many months it will be able to continue to meet its immediate expenses.

# Key Assumptions Used to Develop the Plan

There are a number of assumptions that are used in order to project the long term financial results. These assumptions are outlined in detail throughout this section, however, the key assumptions are outlined below:

- Future determinations of the rate peg are forecast to be up to 2.5 percent, however, this may vary depending on the recommendation of the Independent Pricing and Regulatory Tribunal (IPART) from year to year
- Service levels are largely maintained throughout the plan
- Population growth is estimated to continue to increase at 3.1 percent per annum
- The Consumer Price Index (CPI) is estimated at a flat rate of 2.5 percent per annum
- In general, future expenses and revenues have been calculated to reflect forecasts for the CPI
- Increases in revenue from user charges have been maintained using a combination of the CPI and the IPART Local Government Cost Index with utilisation rates remaining steady
- Salary and wage increases are estimated to be on average up to 2.0 percent per annum including turnover
- New borrowings are restricted to ensure the Debt Service Ratio remains less than 10 percent.

Strategic capital expenditure will be considered suitable for funding from internal or external loans in line with intergenerational equity considerations.

## Inflation

CPI is a measure of the change in price of a 'basket' of goods and services. The Reserve Bank has a policy to maintain an inflation rate between its annual target of 2 – 3 percent. Therefore where appropriate, this plan uses a mid-range forecast of a 2.5 percent annual inflation rate.

In preparation of the LTFP however, careful consideration was given to yearly movements in actual costs witnessed over the previous seven year period. From this data, both the historical average annual growth rate and the seven year compounded growth were calculated. These values were contrasted against the forecast inflation rate and where there was a material difference, preference was given towards the historical growth rates.

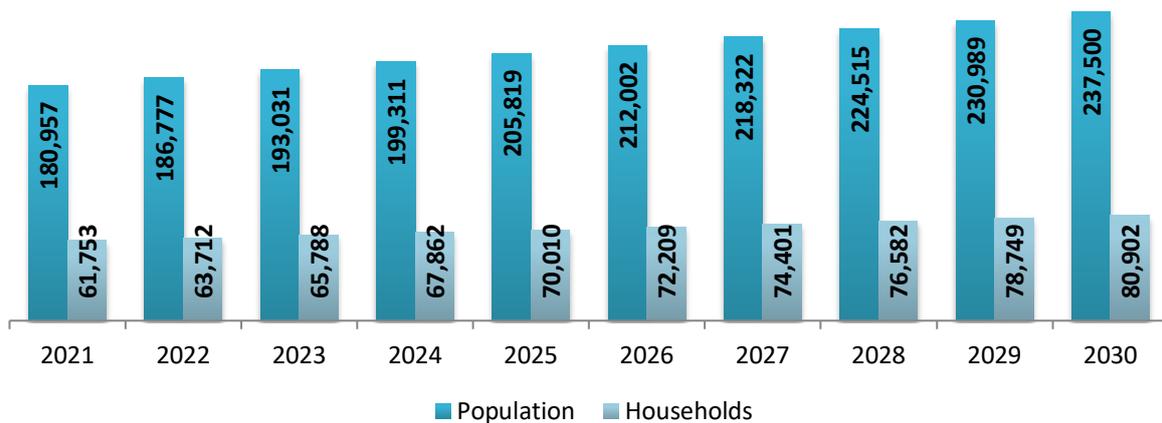

## Historical Yearly Inflation Rates

## Population

A key driver in the level of services Council is required to deliver over the next 10 years is the size of the resident population and number of households within the Local Government Authority (LGA). In the 2016 Census, there were 161,998 people in the Campbelltown LGA. However the Census count is not considered the official population of an area due to limitations in the data collected. It is an official count of all people and dwellings in Australia on Census night, and collects details of age, sex, religion, education and other characteristics of the population. The next Census will be conducted in August 2021.

To provide a more relevant population figure the Australian Bureau of Statistics also produces "Estimated Resident Population" (ERP) numbers for each area. It is updated between Censuses - quarterly for state and national figures, and annually for local government areas. The ERP is based on the usual residence population and includes adjustments for Census undercount, Australian residents who were temporarily overseas on Census night, and backdates the population to 30 June. Each year's updates take into account births, deaths and both internal and overseas migration. The LTFP is modelled on the ERP figures however also references Planning NSW data projections and known development activity as detailed in the new dwelling forecasts

**31%**  
Total percentage change in population between 2021 and 2030

**3.1%**  
Average annual percentage change in population between 2021 and 2030

These growth projections are estimates and are affected by changes in market conditions. The increase in development does provide an additional income stream, however in most cases, this is absorbed by additional maintenance requirements that are created by the provision of additional infrastructure, facilities and open space

# Expenditure Assumptions

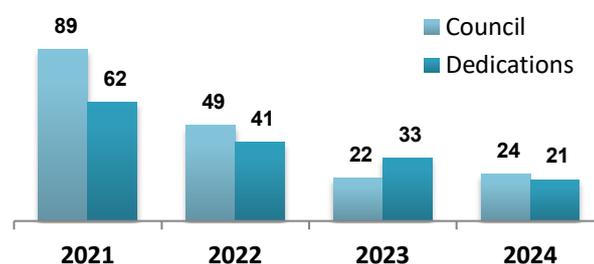

## Major Planned Expenditure

Over the next 10 years, Council will invest and foster approximately \$636m on a range of capital projects and assets across the City. This includes the substantial renewal of Campbelltown's existing assets, as well as the development of new services, facilities and infrastructure networks.

Major projects that will be considered over the next few years are listed below:

- **Badgally Road:** Upgrade Badgally Road to four lanes from Eagle Vale Drive to North Steyne Road including installation of traffic signals at two intersections and a two lane circulating roundabout
- **Campbelltown Billabong Parklands:** Commence design and construction of the Billabong project including recreational water play facilities over a four hectare site in the city centre on the corner of Oxley Street and The Parkway, Bradbury
- **Community Recycling Centre (CRC):** The CRC will provide residents with a dedicated drop-off facility for household problem wastes such as paints and oils, gas bottles, e-waste, batteries and the like. It is due for completion by late 2020
- **Centre of Excellence:** Initiate the construction phase for the Campbelltown Sport and Health Centre of Excellence
- **Bunnings:** Facilitate construction of Bunnings development on Council land (Farrow Road)

4 Year Capital Expenditure Program \$M

As well as these major projects, investigations/works are underway for the following potential projects:

- Investigate site options for a new Civic Library in Campbelltown CBD
- Progress plans for the Health and Education Precinct
- Investigate Campbelltown and Ingleburn CBD Stormwater upgrade options
- Arts Centre expansion
- South West Sydney Community and Justice Precinct
- Investigate feasibility to expand Campbelltown Stadium.

## Employee Costs

Employee costs includes wages and salaries and other associated costs such as superannuation and workers compensation. Increases in labour and on-costs are composed of several elements. These include changes to employee numbers, salary system increments, Local Government Award increments and additional costs associated with position reclassifications.

The employee costs for 2021-2022 and forward budgets have been adjusted to take into account anticipated Local Government Award wage movements and salary system skills progression.

The plan reflects annualised gross wage increases up to 2.0 percent over the life of the plan. Any plans for changes to employee numbers or reclassifications will be required to be part of the Workforce Management Plan with supported funding.

The 2021-2022 Operational Plan will support a new organisational structure that will meet a new set of priorities in strengthening our organisation to deal with future challenges and the growth of our city. The restructuring of the organisation is a high priority which will reflect changes in areas of responsibility throughout Council.

The legislated changes to the Superannuation Guarantee Levy progressively increases from the current rate of 9.5 percent to 12 percent by 2025-2026, has been factored into the estimates.

In 2009-2010, the Local Government Superannuation Defined Benefits Scheme doubled the normal contribution rate required to be paid by Council in order to sustain the viability of the fund due to the Global Financial Crisis (GFC). The increased payments will continue for several years and have added approximately \$485,000 per year to operational costs.

### **Materials and Contracts**

Materials expenses have been adjusted in line with an inflation factor of up to 2.5 percent. Contracts expenses have been adjusted with a growth factor of up to 3.6 percent to match historical trends.

### **Depreciation**

Depreciation estimates have been based on the projected capital expenditure program contained within the plan. The forward budget also takes into account the estimates of periodic revaluations of infrastructure assets and is directly

impacted by the Asset Management Plan. This brings to account the impact of rising replacement costs of assets. The recognition of such assets and any capital expenditure on new assets will increase the depreciation costs. This will further impact on Council's operating results, however, will not affect the annual budget considerations as depreciation is a non-cash item. Council's depreciation methodology utilises long and medium depreciation rates for infrastructure assets. It is anticipated that this will decrease depreciation to be more in line with actual asset degradation.

### **Borrowing Costs**

Borrowing costs represents the interest paid on borrowings. There are no future external borrowings factored into this Plan, rather an internal borrowing strategy for \$3.0m in the first year of the plan and \$2.75m thereafter of recurrent capital expenditure per annum. This will reduce the external borrowing costs paid per annum from 2021-2022 by a reducing amount of around \$120k. This strategy will increase Council's capacity to borrow externally through the State Borrowing Facility for major stand-alone capital projects and support intergenerational equity principals.

### **Other Expenses**

Other expenses incorporate items such as insurance, telecommunication and utility charges. The plan includes a default CPI increase of up to 2.5 percent for the majority of items however this rate is adjusted where an analysis of historical growth rates materially differs.

# Revenue Assumptions

## Rates

For the 2021-2022 budget, Council has applied the rate peg limit as set by IPART of 2.6 percent. The LTFP however has aimed for a more conservative approach for all subsequent years and has applied a general rates increase of 2.5 percent to be in line with the Local Government Cost Index developed by IPART. Invariably, rate pegging increases have been less than the actual increases in costs faced by Council. Despite these constraints, and with the cost of materials and provision of services increasing above the Consumer Price Index (CPI), Council maintains a sound financial position through continuous efficiency gains and productivity improvements. The Special Rate Variation received in the 2014-2015 financial year has strengthened Council's long term financial position and provides a means to renew and revitalise the city's assets and ultimately address Council's asset maintenance and renewal backlog.

## Domestic waste management

The Domestic Waste Management Charge will increase by 1.3 percent from the current charge of \$353.03 per annum to \$357.52 in 2021-2022. Projected increases for future years have been based on up to 4 percent per annum, however, will reflect the costs of providing the service on a yearly basis. This charge is calculated using cost recovery methodology.

## Operating grants

The Australian Accounting Standards require councils to recognise grant income when received. This accounting treatment is required for any other grants that councils receive in advance, irrespective of annual expenditure of those grants, which

may be in future years. This has an effect of distorting the income statement between years. However, the net budget impact is zero between various financial years. In broad terms, all other recurrent operating grants in future years are generally projected to increase less than CPI at around 1 percent.

## Operating contributions

There are only relatively minor allocations budgeted to be received from community groups and sporting clubs as their contribution towards projects in future years. Subsidies received from Local Infrastructure Renewal Scheme borrowings are also allocated to this category.

## Interest

Interest on investments is assessed on a conservative basis. Interest income only makes up around 3 percent of total revenue so changes in this area will only marginally affect Council's LTFP. The net positive yields on cash investments along with a reduction in portfolio balance due to the funding of major capital works are factored into income with a return that equals an estimated 1.6 percent per annum.

## User charges

In accordance with Council's Revenue Pricing Policy, wherever it is reasonably possible to do so, a 'user pays' approach to reviewing fees and charges will be applied. The approach is to ensure that applicable fees and charges are reviewed beyond just CPI movements and are in line with the cost of providing that service.

### **Statutory fees**

While Council has discretion over the level of fees and charges in general, there are a variety of fees that are prescribed by the State Government. These statutory fees typically increase on a periodic basis rather than annually. The trend over the future years is therefore flatter than user charges income however as many of these fees arise through development functions there is fluctuations experienced that reflect housing market activity. The majority of statutory fees have been modelled to increase by up to 2.5 – 3 percent over the next 10 years.

### **COVID 19 Implications**

At the time of writing the LTFP, the full impact of COVID-19 on Council's long term financial position requires ongoing modelling. As such, estimated impacts from COVID-19 have been modelled in the Pessimistic scenario in this instance. Council will reassess the modelling in the subsequent LTFP whilst also report on required amendments to the Operational Plan and Budget quarterly.

# Scenarios

This LTFP presents long term projections based on various assumptions. As it is difficult to accurately predict all future trends, alternative scenarios have been modelled to help provide an indication of Council's future financial position under a variety of circumstances. The statements of all scenarios are presented in this plan however only the ratios for the base scenario have been presented.

## Base Scenario

The base scenario forms the basis of Council's LTFP. It is based on a range of assumptions which are considered most likely to occur over the next 10 years based on an assessment of current economic conditions and historical trends. Whilst this scenario does not represent a pessimistic view of future trends, it does encompass a degree of conservatism in modelled growth rates in expenditure and revenue.

The following two scenarios are based on outcomes that whilst are not considered unrealistic to occur, are considered to be less likely to occur. The forecast financial statements for all scenarios are presented in this plan. However performance measures only for the base are presented.

## Optimistic Scenario

The optimistic scenario is based on future trends that are in most cases understating the conservative nature of the assumptions built in to the base scenario.

## Pessimistic Scenario

The pessimistic scenario is based on future trends that are in most cases overstating the conservative nature of the assumptions built in to the base scenario.

The pessimistic scenario also encompasses the various assumptions related to the worst case scenario financial impacts of COVID-19.

# Risks and Sensitivity Analysis

In preparing this LTFP, it was necessary for Council to make a number of assumptions about the future. Under the Office of Local Government's Planning and Reporting Guidelines for Local Government in NSW, Council is required to identify the planning assumptions and the risks of those assumptions (sensitivity analysis) to financial estimates in the LTFP.

The following tables identify significant forecasting assumptions, describe the risk in making such an assumption, rate the level of risk, give reason for the risk rating and explain how that level of risk may affect financial estimates in the plan.

Many of the planning assumptions will come from the Community Strategic Planning process, others will be derived from general financial planning practices.

| Category   | Assumption  | Risk  | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|------------|---|---|---------------|---|
| Population | Planning for activities, and thus the likely cost of providing those activities, considers that the population of Campbelltown will increase at the rate forecast by Council's growth model. That model predicts the population of Campbelltown to reach 237,500 by 2030  | That population growth is higher than projected, and Council will need to provide additional unplanned services and infrastructure though will yield additional rates   | Low           | Population projections are based on a standard set of demographic assumptions inclusive of additional growth. Population projections are not expected to rapidly change, therefore the level of risk is low and little financial impact is expected   |
|            |   | That population growth is lower than projected, and Council will be required to support excess levels of infrastructure and service delivery based on growth happening outside of the LGA which provides no rates yield | Low           |   |
| Growth     | Council levies rates on property owners to fund community services and the costs of infrastructure in the city. The total projected revenue from rates is dependent on the forecast growth in the number of residential, business, farmland and mining properties. This forecast is based on Council's growth model, modified for short to medium term economic conditions and depends on the demands of the market | Should growth in the number of properties vary considerably from forecasts, there is a possibility that revenue collected from rates will be too much or too little to fund Council's services and capital program      | Moderate      | Growth projections are based on a standard set of demographic assumptions inclusive of additional growth. Growth projections are not expected to change quickly, however the timing of that growth and its impact on Council's revenue will affect the funds available for service provision in this Long Term Financial Plan |
|            |   | If the timing of growth differs significantly from forecast, this will impact on Council's cash flows and may necessitate changes to planned borrowings for capital purposes  | Moderate      |   |

| Category                    | Assumption   | Risk  | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|-----------------------------|--|---|---------------|---|
| <b>Economic environment</b> | Council has prepared this Long Term Financial Plan on the basis that current predictions on the rate of growth in world market conditions will remain low over the medium to short term.   | The current market conditions significantly decline impacting on cost of borrowing, returns on investments and cost of foreign currency transactions. | Low           | <p>Projections built into this this Long Term Financial Plan factor in Council paying all external borrowings by 2026. Council manages the risk in the interim by borrowing long term and fixing the interest rate.</p> <p>The income derived from investments comprises less than 2% of total revenue so changes in this amount is not likely to materially impact on Council's financial viability.</p> <p>It should also be noted that Council does not engage in transactions expressed in foreign currencies and is therefore not directly subject to foreign currency risk.</p> |
| <b>Environmental change</b> | This Long Term Financial Plan is prepared on the assumption that environmental change (i.e. climate change) will not have a direct significant impact on the environment of Campbelltown within the 10 year Long Term Financial Plan | Environmental change accelerates  | Low           | Should environmental impacts significantly change such that the environment and economy of Campbelltown is greatly affected in the next 10 years, the activities and services outlined in the Long Term Financial Plan will fundamentally change. These changes would be reflected in an amended Long Term Financial Plan.  |

| Category                  | Assumption  | Risk   | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|---------------------------|---|--|---------------|---|
| <b>Legislative change</b> | Council will continue to operate within the same general legislative environment and with the same authority as it does at the time this Long Term Financial Plan is published.   | Should the Local Government legislative environment change, the services and functions Council plans to provide over the 10 year period could change | Moderate      | At the time of adopting this Long Term Financial Plan, Council is unable to determine how potential legislative change might impact its operations or quantify the potential financial impact.                        |
| <b>Statutory fees</b>     | Based on historical trends, statutory fees are assumed to increase by an average of 2.3% per year   | That statutory fees increase by less than the assumed rate   | Low           | Statutory fees make up slightly less than 3% of Council's revenue base and as such identified a low level of financial impact   |
| <b>Service levels</b>     | Service levels largely remain the same throughout the Long Term Financial Plan  | Requirement of service levels to increase  | Moderate      | The provision of current service levels requires 100% of current income streams. Any increase in service levels requires sourcing of new/increased income streams or the reduction of another service level to offset |
| <b>Rating base</b>        | The projected percentage increase in rates is in accordance with the estimated annual determination by the Independent Pricing and Regulatory Tribunal under delegation by the Minister for Local Government. The rate peg determination for 2020-2021 is 2.6%. The increases in rates for years from 1 July 2021 include the assumption that the annual determination will be 2.5%. This will generate additional income of approximately \$2.5m each year | The Ministerial rate determination is less than 2.5%   | High          | Variances between the forecast and the actual rate peg by every 0.5% would result in an average shortfall of \$1.9m over the length of the forecast period  |

| Category                         | Assumption   | Risk   | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan   |
|----------------------------------|--|--|---------------|--|
|                                  | Redevelopment of Housing NSW estates i.e. Claymore and Macquarie Fields will occur outside predicted timeframes  | The redevelopment occurs at an increased pace than anticipated                                 | Moderate      | Any redevelopment of an estate with Housing NSW properties will impact the plan during the demolition and rebuilding phase due to vacant land being exempt from rates. Once rebuilt, the properties will be rateable again. Market forces will determine the speed at which the development occurs and as such, it is anticipated to extend beyond the 10 year period reflected in this Long Term Financial Plan |
|                                  | Development of the plan assumes that the current level of rate exemptions remain constant  | The scope for increased entitlement to exemptions  | High          | Community Housing Providers that meet the Public Benevolent Institution criteria may be exempt from paying land rates to local councils. The impact on Council's revenue could potentially be up to \$5m dependent upon applicants meeting appropriate criteria  |
| <b>Domestic waste management</b> | The plan assumes the Domestic Waste Charge will increase on average by 4% per year due to possible significant increases to the Domestic Waste Disposal contract | On renewal of the disposal or collection contracts, contractor prices increase greater than 4% | Low           | The Domestic Waste Charge is calculated based on pure cost recovery of service provision. Therefore an increase in the contractors cost will be directly offset by an increase in the annual charge. The impact on residents of a 5% increase is approximately \$15 per year per assessment  |
| <b>Council policy</b>            | There will be no significant changes to Council policy as summarised in this Long Term Financial Plan  | New legislation is enacted that requires a significant policy response from Council            | Low           | Dealing with changes in legislation is part of normal Council operations, however impact on resources will be assessed and will increase the exposure to further resource requirements   |

| Category                           | Assumption  | Risk   | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|------------------------------------|---|--|---------------|---|
|                                    |   | Election of a new Council with different objectives from current Council                                       | Moderate      | Any significant change to Council policy would be assessed in terms of impact on Council's financial position   |
| <b>Financial assistance grants</b> | The Long Term Financial Plan assumes Council's financial assistance grant will experience slow growth.  | Changes to amount of grant or variation to assessment criteria equating to a reduction in Council's allocation | Moderate      | Every 1% the Financial Assistance Grant movement is below target equates to around \$100k. Council is not informed of their Financial Assistance Grant allocation until approximately August of the same financial year. Council is not informed of allocations beyond the one year period. |
| <b>Inflation</b>                   | The price level changes projected will occur. In developing this Long Term Financial Plan, Council has based inflation projections at an average 2.5% per annum | Inflation is higher or lower than anticipated  | Low           | Inflation is affected by external economic factors  |
|                                    |   | Inflation on costs will not be offset by inflation on revenues   | Moderate      | Any inflationary increase in Council's costs that is not offset by efficiency gains or revenue increases is likely to impact service levels and works programmed  |

| Category                     | Assumption  | Risk  | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|------------------------------|---|---|---------------|---|
| <b>Borrowing costs</b>       | Interest on debt is known and calculated according to the fixed rate contract. Council assumes no further Local Infrastructure Renewal Scheme rounds to be available. Council has proposed to borrow internally from reserves and meet repayments incorporating an interest rate subject to market lending conditions and Council's financial position. | Interest rates will vary from those projected   | Low           | Relates to projected new external debt at anticipated new interest rates. Existing borrowings are fixed term interest rates and as such, interest expense and repayments are known. If the actual interest rates are higher than the assumed rate, it should be noted it will be hedged by increased interest on investments revenue. As Council proposes to borrow internally for recurrent capital works without new external borrowings forecast interest rate fluctuations will not impact this Plan. |
| <b>Return on investments</b> | Interest on investments is calculated at 1.6% for year 1 and held constant for all future years   | Interest rates will vary from those projected   | Moderate      | Rates used are based on detailed analysis. If actual interest rates are lower than the assumed rate, expenditure priorities would be re-evaluated or alternative funding mechanisms utilised. It should be noted that any increases in revenue due to increased interest rates may be partially offset by increased interest borrowing costs on any new loan borrowings or offset by larger funds on investment   |
| <b>Asset revaluations</b>    | The impact of asset revaluations on carrying values and depreciation will occur as projected  | Revaluations will materially differ from those projected, thereby changing projected carrying values of the assets and depreciation expense | Moderate      | Variation in values is expected to be low unless valuation methodology changes or there is an unexpected movement in market values  |

| Category                             | Assumption   | Risk   | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan   |
|--------------------------------------|--|--|---------------|--|
| <b>Asset life</b>                    | Useful life of assets is as recorded in the asset management plans or based on professional advice. The useful life of assets grouped by asset class   | Assets wear out earlier than estimated or asset lives are changed due to revisions of the asset management plans or new advice | Moderate      | Capital renewal could be brought forward in the event of early expiration of assets, but depreciation expense and financing costs would increase   |
| <b>Depreciation and amortisation</b> | Assumes maintenance of existing arrangements for the purchase and sale of assets. Directly impacted by Council's Asset Management Strategy and the impact of any revaluation in asset classes. This Plan forecasts depreciation based on a straight line methodology for long and medium life infrastructure assets. | Methodology does not realise the anticipated result  | Moderate      | Council does not fund depreciation and amortisation of assets. As such, the changes in depreciation will not impact Council's budget, however, will be reflected on Council's income statement and will also impact the Operating Performance Ratio, Building and Infrastructure Asset Renewal Ratio and Real Operating Expenditure per capita result. |
| <b>Contract rates</b>                | Re-tendering of major contracts will not result in significant cost increases other than those that are comparable with the rate of inflation  | There is a significant variation in price from re-tendering contracts  | Moderate      | Council would review the scope of work planned to meet the budget restrictions   |
|                                      | The plan has factored in a 2.5% increase in disposal charges for Domestic Waste collected  | There is a significant variation to the current contract or a new contract is negotiated                                       | Moderate      | The Domestic Waste Charge is calculated based on pure cost recovery of service provision. Therefore an increase in the contractors cost will be directly offset by an increase in the annual charge. The impact on residents of a 1% increase is approximately \$3.20 per year per assessment  |

| Category                | Assumption   | Risk   | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|-------------------------|--|--|---------------|---|
| <b>Capital works</b>    | Actual costs will vary from estimates, due to higher input prices or delivery delays, resulting in budget shortfalls   | Asset renewal and replacement budgets have been prepared on the basis that future the rate peg of 2.5% is determined by the Minister and all current sources of funding remain available | Moderate      | Council is confident in the planning work undertaken on capital projects, but recognises external economic factors may impact on the costs and delivery timeframes for capital works  |
| <b>Superannuation</b>   | The Federal Government announced changes that will gradually increase the Superannuation Guarantee Levy from 9% to 12% beginning 2013-2014 to 2025-2026. This increase equates to \$2m per year once levy reaches 12%. | That employee costs increase more than projected   | Moderate      | As Council is a service provider, employee costs are a large portion of operating expenses. A 2.5% increase in employee costs is estimated to increase superannuation costs by \$150k |
| <b>Energy-utilities</b> | The plan assumes an energy increase of 2.5% per year. This accounts for price and usage based increases offset by sustainability projects savings and is in line with the seven year historical growth rate.           | That utility costs increase more than projected  | Moderate      | An increase of 1% above forecasts would increase utility costs by less than \$30k   |

| Category              | Assumption  | Risk  | Level of risk | Reason for level of risk, and impact on Long Term Financial Plan  |
|-----------------------|---|---|---------------|---|
| <b>Cost shifting</b>  | The issue of cost shifting has, in recent years, been of significant concern to councils in NSW and all over Australia. In the most recent published report by Local Government NSW, based on the 2015-2016 financial year, Council estimates the total cost shifting for Council to be \$8.1m. | That new or increased services and functions are transferred to Local Government responsibility | Moderate      | Should State and Federal Governments continue to transfer responsibilities and the associated costs for the provision of services to Local Government, this will have negative implications for Campbelltown's long term financial outlook. Cost shifting absorbs 5.4% of Council's operational income.                                     |
| <b>Employee costs</b> | The staffing and organisation structure remains constant  | Changes to levels of service  | Moderate      | As Council is a service provider, employee costs are a large portion of operating expenses. Forecasting assumptions used are based on expected Local Government Award variations and performance based increases. An increase of 1% above forecasts would increase 2021-2022 employee costs by \$620k (equivalent to less than 1% of rates) |

# Key Financial Indicators

## Indicator #1 - Operating performance measure

**Indicator Title:** Operating Performance Ratio

**Indicator Definition:** Net continuing operating result (excluding capital grants and contributions) / Total continuing operating revenue (excluding capital grants and contributions)

**Benchmark:**

- ≥ 0% 
- 0% - (3%) 
- < (3%) 

| Year ended |  | June  | June  | June   | June  | June  | June  | June  | June  | June  |   |
|------------|--|---|---|--|---|---|---|---|---|---|---|
|            |  | 2021  | 2022  | 2023   | 2024  | 2025  | 2026  | 2027  | 2028  | 2029  | 2030  |
|            |  | (1.73%)   | 0.54%   | 1.74%  | 2.63%   | 2.24%   | 3.10%   | 3.52%   | 3.96%   | 4.02%   | 4.82%   |
|            |  |  |  |  |  |  |  |  |  |  |  |

### Operating Performance Measure Explained

Measures a Council's ability to contain operating expenditure within operating revenue.

A ratio of less than negative 3% is undesirable  between 0% and negative 3% is fair  greater than or equal to 0% (break even) is good 

### Commentary

It is important to note that this indicator is heavily impacted by depreciation and the split of capital works v operational expense that is dispersed during any one year. Depreciation is an accounting measure of the estimated reduction in asset value over time. Rather than the basic calculation of depreciation, Council funds the total asset renewal and maintenance required according to detailed lifecycle modelling of each individual asset and in alignment with Council's Asset Management Plans. Council's short term sustainability is better reflected by reference to the Unrestricted Current Ratio and Own Source Revenue Ratio. Council's longer term sustainability can also be supported by the improved infrastructure backlog ratio.

**Indicator #2 - Own Source Revenue**

**Indicator Title:** Own Source Revenue Ratio

**Indicator Definition:** Total continuing operating revenue (excluding all grants and contributions) / Total continuing operating revenue

**Benchmark:**

|          |   |
|----------|---|
| > 60%    |  |
| 50 - 60% |  |
| < 50%    |  |

| <b>Year ended</b>   |   |  |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|
| <b>June</b>   | <b>June</b>   | <b>June</b>  | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   |
| <b>2021</b>   | <b>2022</b>   | <b>2023</b>  | <b>2024</b>   | <b>2025</b>   | <b>2026</b>   | <b>2027</b>   | <b>2028</b>   | <b>2029</b>   | <b>2030</b>   |
| 57.07%  | 63.20%  | 70.37%   | 74.73%  | 75.77%  | 76.25%  | 77.42%  | 77.87%  | 78.32%  | 84.37%  |
|  |  |  |  |  |  |  |  |  |  |

**Own Source Revenue Measure Explained**

This ratio measures fiscal flexibility and robustness. It is the degree of reliance on external funding sources such as operating grants and contributions. A Council's financial flexibility improves the higher the level of its own source revenue. It also gives Council a greater ability to manage external challenges that arise.

**Commentary**

Council forecasts to exceed the benchmark for Own Source Revenue in the long term. This displays Council's ability to control operating performance and support financial sustainability.

Council's performance in this ratio is heavily impacted by developer contributions that are excluded as own source revenue and are significant in value.

**Indicator #3 - Cash Liquidity Position after accounting for external reserves**

**Indicator Title:** Unrestricted Current Ratio

**Indicator Definition:** Current Assets less Externally Restricted Current Assets / Current Liabilities less Specific Purpose Current Liabilities

**Benchmark:**  
 Greater than 2:1   
 Between 1:1 and 2:1   
 Less than 1:1 

| <b>Year ended</b>   |   |  |   |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|---|
| <b>June</b>   | <b>June</b>   | <b>June</b>  | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   |
| <b>2021</b>   | <b>2022</b>   | <b>2023</b>  | <b>2024</b>   | <b>2025</b>   | <b>2026</b>   | <b>2027</b>   | <b>2028</b>   | <b>2029</b>   | <b>2029</b>   | <b>2030</b>   |
| 5.48  | 5.55  | 6.15   | 6.62  | 6.90  | 7.25  | 7.59  | 7.91  | 8.22  | 8.22  | 8.53  |
|  |  |  |  |  |  |  |  |  |  |  |

**Cash Liquidity Position Measure Explained**

Shows Council's ability to meet debt payments as they fall due.

A ratio of less than one is undesirable  between one and two is fair  and greater than two is good 

Council's forecasted cash liquidity position will remain above two over the next ten years. This is mainly due to Council's strong internal reserves.

**Commentary**

Council's liquidity is more than satisfactory. Council can easily pay its debts as they fall due.

**Indicator #4 - Borrowing and Debt Servicing**

**Indicator Title:** Debt Service Ratio

**Indicator Definition:** Cost of debt service (interest expense and principal repayments) / Total continuing operating revenue (excluding capital grants and contributions)

**Benchmark:**  
 > 0% - 10%   
 10% - 20%   
 > 20% 

| <b>Year ended</b>   |   |  |   |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|---|
| <b>June</b>   | <b>June</b>   | <b>June</b>  | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   |
| <b>2021</b>   | <b>2022</b>   | <b>2023</b>  | <b>2024</b>   | <b>2025</b>   | <b>2026</b>   | <b>2027</b>   | <b>2028</b>   | <b>2029</b>   | <b>2029</b>   | <b>2030</b>   |
| 1.81%   | 1.56%   | 1.43%  | 0.76%   | 0.54%   | 0.00%   | 0.00%   | 0.00%   | 0.00%   | 0.00%   | 0.00%   |
|  |  |  |  |  |  |  |  |  |  |  |

**Debt Service Ratio Measure Explained**

This measure reflects the percentage of annual revenue required to meet annual loan repayments. Prudent debt usage can also assist in smoothing funding costs and promoting intergenerational equity.

A ratio of greater than 20% is undesirable  Between 10% and 20% is fair  and less than 10% is good 

**Commentary**

Council's ability to service its debt is excellent. In 2020 the decrease in debt servicing cost results from the finalisation of a interest free loan that funded the Farrow Road link to Campbelltown Railway Station.

**Indicator #5 - Cash Expense Coverage**

**Indicator Title:** Cash Expense Cover Ratio

**Indicator Definition:** (Current year’s cash and cash equivalents + term deposits / Payments from cash flow of operating and financing activities)\*12

**Benchmark:** ≥ 3 Months   
 < 3 months 

| <b>Year ended</b>   |   |  |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|
| <b>June</b>   | <b>June</b>   | <b>June</b>  | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   |
| <b>2021</b>   | <b>2022</b>   | <b>2023</b>  | <b>2024</b>   | <b>2025</b>   | <b>2026</b>   | <b>2027</b>   | <b>2028</b>   | <b>2029</b>   | <b>2030</b>   |
| 13.6  | 13.8  | 15.0   | 16.2  | 16.7  | 17.9  | 18.8  | 19.7  | 20.5  | 21.4  |
|  |  |  |  |  |  |  |  |  |  |

**Building and Asset Renewal Expenditure Measure Explained**

This ratio compares the proportion spent on infrastructure asset renewals and the asset's deterioration in terms of depreciation.

A ratio of less than 100% is undesirable  while a ratio of 100% or greater is desirable 

**Commentary**

This liquidity ratio indicates the number of months Council can continue paying for its immediate expenses without additional cash inflow

**Indicator #6 - Building and Asset Renewal**

**Indicator Title:** Building and Asset Renewal Ratio

**Indicator Definition:** Asset renewals (building and infrastructure) / Depreciation, amortisation and impairment (building and infrastructure)

**Benchmark:**  $\geq 100\%$    
 Less than 100% 

| Year ended  |   |  |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|
| June 2021   | June 2022   | June 2023  | June 2024   | June 2025   | June 2026   | June 2027   | June 2028   | June 2029   | June 2030   |
| 112.06%   | 112.24%   | 115.41%  | 117.20%   | 114.94%   | 112.32%   | 110.03%   | 106.70%   | 102.03%   | 103.81%   |
|  |  |  |  |  |  |  |  |  |  |

**Building and Asset Renewal Expenditure Measure Explained**

This ratio compares the proportion spent on infrastructure asset renewals and the asset's deterioration in terms of depreciation.

A ratio of less than 100% is undesirable  while a ratio of 100% or greater is desirable 

**Commentary**

This ratio also uses the accounting measure of depreciation as the required spend on renewing Council's assets per annum. Depreciation is an accounting measure and does not reflect any condition ratings and at best only reflects a residual value. Council undertakes much more complex modelling using current condition assessments of assets to determine actual funding required over the life of each individual asset. Council is currently funding 100% of renewal requirements in strict accordance with the Asset Management Plans. It is also important to note Campbelltown City Council received a "Strong" Infrastructure Management Assessment rating by the Office of Local Government in the 'Local Government Infrastructure Audit' June 2013.

### Indicator #7 - Infrastructure Backlog

**Indicator Title:** Infrastructure Backlog Ratio

**Indicator Definition:** Estimated cost to bring assets to a satisfactory condition / Total (WDV) of infrastructure, buildings, other structures, depreciable land, and improvement assets

**Benchmark:**

|         |   |
|---------|---|
| < 2%    |  |
| 2% - 3% |  |
| > 3%    |  |

| <b>Year ended</b>   |   |  |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|
| <b>June</b>   | <b>June</b>   | <b>June</b>  | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   | <b>June</b>   |
| <b>2021</b>   | <b>2022</b>   | <b>2023</b>  | <b>2024</b>   | <b>2025</b>   | <b>2026</b>   | <b>2027</b>   | <b>2028</b>   | <b>2029</b>   | <b>2030</b>   |
| 0.68%   | 0.58%   | 0.51%  | 0.52%   | 0.54%   | 0.59%   | 0.50%   | 0.51%   | 0.51%   | 0.51%   |
|  |  |  |  |  |  |  |  |  |  |

**Infrastructure Backlog Measure Explained**

The infrastructure backlog ratio indicates the proportion of backlog against the total value of Council's infrastructure assets. It is a measure of the extent to which asset renewal is required to maintain or improve service delivery in a sustainable way. This measures how Council is managing infrastructure which is so critical to effective community sustainability.

A ratio of greater than 3% is undesirable  Between 2% and 3% is fair  and less than 2% is good 

**Commentary**

In 2014-2015 Council implemented a long term asset renewal strategy funded by a special rate variation and loan borrowings. The success of this funding strategy is reflected within this ratio that directly addresses Council's infrastructure backlog and provides adequate funding on an annual basis to support the required asset maintenance and renewals.

**Indicator #8 - Asset Maintenance**

**Indicator Title:** Asset Maintenance Ratio

**Indicator Definition:** Actual asset maintenance / Required asset maintenance

**Benchmark:**

- > 100% 
- 80%-100% 
- < 80% 

| <b>Year ended</b>   |   |  |   |   |   |   |   |   |   |
|---|---|--|---|---|---|---|---|---|---|
| <b>June 2021</b>  | <b>June 2022</b>  | <b>June 2023</b>   | <b>June 2024</b>  | <b>June 2025</b>  | <b>June 2026</b>  | <b>June 2027</b>  | <b>June 2028</b>  | <b>June 2029</b>  | <b>June 2030</b>  |
| 100.00%   | 100.00%   | 100.00%  | 100.00%   | 100.00%   | 100.00%   | 100.00%   | 100.00%   | 100.00%   | 100.00%   |
|  |  |  |  |  |  |  |  |  |  |

**Asset Maintenance Measure Explained**

The asset maintenance ratio reflects the actual asset maintenance expenditure relative to the required asset maintenance. The ratio provides a measure of the rate of asset degradation (or renewal) and therefore has a role in informing asset renewal and capital works planning.

A ratio of less than 80% is undesirable  Between 80% and 100% is fair  and greater than 100% is good 

**Commentary**

In 2014-2015 Council implemented a long term asset renewal strategy funded by a special rate variation and loan borrowings. The success of this funding strategy is reflected within this ratio that directly addresses Council's annual required maintenance and provides adequate funding to ensure appropriate condition of assets is maintained.
